

TOOL BACKPACK 45 POCKETS

VIMOPF45

Designed for professionals who need to transport and organise tools, this backpack is made of polyester, offering adequate resistance for daily use in demanding maintenance, installation, or technical assistance environments. With 45 pockets, it includes multiple side compartments, interior pockets and a waterproof leather organiser pouch, ensuring structured storage and protection for your accessories. In addition, the main compartment with full opening allows quick and direct access to tools, facilitating work on site. Designed to optimise user comfort during frequent travel, this backpack features padded shoulder straps and back, reducing fatigue even when fully packed. Adjustable buckles ensure the outer compartment closes securely, while the zippers make it easier to open and close. The backpack`s functionality is enhanced by the metal side accessory for a measuring tape, the loop handle for quick transport, and the balanced construction that combines organisation, comfort, and durability.
