

WISEU HOE

VI0222

The VITO Viseu peta hoe, made from tempered steel, offers strength and long lifespan for agricultural and gardening tasks. Its flat blade is designed for soil leveling, cutting through compacted earth, removing weeds and preparing planting areas. The tool's elongated shape enhances penetration and soil movement, making it efficient for both garden and small-scale farming use. The 34 mm socket ensures compatibility with standard handles and provides excellent force transfer for controlled and comfortable operation.

Key features

- > Tempered steel construction for long-lasting durability
- > Flat blade ideal for soil leveling and cultivation
- > Traditional peta design for use in compact soils
- > Suitable for gardening and small agricultural tasks
- > Fits Ø 34 mm handles
- > Strong force transfer reduces user fatigue
- > Versatile tool for soil preparation and weed removal
- > Robust build for intensive use
