

## ONION DIGGING HOE

VI0311

The VITO ceboleiro peta hoe is a precise, lightweight tool designed for horticultural tasks such as weeding between plants, preparing garden beds and gently loosening soil. Made from tempered steel, it provides excellent durability and performance. Its narrow blade allows detailed work in tight spaces without damaging roots or young plants. The 33 mm socket fits compatible handles, ensuring comfortable operation and efficient force transfer.

### Key features

- > Tempered steel construction for long-lasting durability
- > Narrow blade for precise weeding
- > Ideal for horticulture, greenhouses and garden beds
- > Traditional peta design for controlled soil movement
- > Fits Ø 33 mm handles
- > Lightweight and easy to handle
