

TWO-POINTED PRONG FORK HOE VI1150

The VITO two-point hoe, made from tempered steel, is designed for agricultural work requiring power, accuracy and deep soil penetration. Its two sharp, narrow points focus applied force, enabling efficient trenching, breaking compacted layers and cutting small roots. This dual-tip design excels in hard or dry soils, allowing controlled and effective digging. The reinforced ring socket provides a secure connection to the handle, ensuring stability and safety during use. A durable and reliable tool, suitable for professional farming and precise horticultural work.

Key features

- > Tempered steel construction for maximum strength
- > Two sharp points for deep soil penetration
- > Ideal for trenching, root cutting and localized soil work
- > Excellent performance in compacted or dry soils
- > Reinforced ring socket for handle stability
- > Concentrated force reduces user effort
- > Built for intensive field use Suitable for vineyards, orchards and garden beds

Specifications

Diameter	38 mm
Handle	VI4015
Material	Hardened steel
Number (Nº)	2
Size	120 x 245 mm
Weight	0,75 kg
