

RIGHT-HAND GRIP SCYTHER HANDLE VI4800

The Right-side scythe handle is made from high-strength steel, ensuring durability and safety in cutting operations. Measuring 1.41 meters long and weighing 1.3 kg, it offers an excellent balance between robustness and maneuverability, making it easier to work on different types of terrain. This handle is designed for both cutting dense vegetation and clearing pastures, making it an indispensable tool for anyone dealing with the maintenance of green and agricultural areas. Furthermore, its steel construction provides longer life and wear resistance.

Specifications
