

SELF-ADJUSTING PIN TERMINAL CRIMPING PLIERS

VIAACP0256

The new full range of Crimping Pliers is designed to cut, strip and crimp cables safely, ensuring high quality results. They are versatile and suitable for various types of needs in telecommunications and electricity, from network cables, solid cables, modular plugs, pin-end terminals and insulated terminals. These pliers stand out for their ease of handling thanks to their soft handles and their sturdy steel body, increasing the comfort while working and ensuring a longer service life. They have the advantage of the ratchet mechanism, thus getting a precise and symmetrical crimping, as well as easy unlocking in case of mishandling.

Key features

- > - Self-adjustable
- > Plug connectors: insulated and non-insulated
- > Carbon steel body
- > PVC coated handle
- > Conductor cross - section: 0,25-6mm².

Specifications

Conductor cross-section	0,25-6mm ²
Handle	PVC
Material	Carbon steel
Size	175 mm
Type of terminals	Insulated and non-insulated
