

STUD CRIMPER

VIACP

VITO's Stud Crimper is a practical and efficient solution for joining metal sheets and profiles in plasterboard structures. Its quick fastening mechanism ensures firm and precise joints, speeding up the assembly process and ensuring stability for the final screw fastening. Featuring ergonomic handles, it offers comfort and control even during prolonged use.

Key features

- > Efficient and quick joining of metal profiles;
- > Firm and precise fastening;
- > Comfortable handles that reduce strain during prolonged use.
