

20V

FLOODLIGHT 35W - 20V

VIBCP3520

VITO's 35W 20V floodlight is the ideal solution for illuminating work environments with power and versatility. With an inclinable opening angle of 120° and the possibility of adjusting between two intensities, this spotlight provides a wide and comprehensive illumination of the desired area. In addition, it is equipped with an On/Off button that allows you to control the equipment more quickly and conveniently. It also includes a protective rubber against impacts and an ergonomic handle, increasing its resistance and user comfort. Furthermore, it is powered by a common 20V battery, which can be used in several machines in the same range, promoting versatility and autonomy.

Key features

- > 120° opening angle, guaranteeing wide and uniform lighting;
- > Versatility ensured by the possibility of adjusting between two light intensities;
- > Optimized control by the integrated on/off switch;
- > Compatible with common batteries of 20V (2Ah to 6Ah);
- > Protective rubber that increases resistance against impacts;
- > Ergonomic handle, promoting comfort and practicality when transporting and handling.

Specifications

Beam angle	120°
Colour Temperature	6500 K
Luminous flux	1 - 5000 LM 2 - 2000 LM
Number of LEDs	100 pcs SMD
Rated power	35W
Voltage	20V
