

HYDRAULIC COUPLER 1/8"

VIBLUB

The hydraulic coupler is designed for lubrication applications, providing a secure connection between the pressure grease hose and the grease fitting. Featuring a 1/8" thread, it incorporates a 4-jaw locking system that ensures a firm grip during lubrication. The integrated ball check valve helps prevent grease leakage and maintains efficient lubricant flow. Suitable for use with pressure grease hoses, it is ideal for workshops, industrial maintenance, agricultural machinery and construction equipment.

Key features

- 1/8" threaded connection
- 4-jaw locking system
- Integrated ball check valve
- Compatible with pressure grease hoses
- Secure lubrication connection
- Suitable for machinery maintenance

Specifications

Fixing thread	**1/8”**
Sheet holder	**4**
Size	**40 x 15 mm**
Suitable for	**Pressure hose**
