

SET OF 3 PARTICULATE RESPIRATORS WITH VALVE FFP1

VIC821VP1

The VITO FFP1 NR D Mask with Valve offers reliable respiratory protection against dust and non-toxic solid aerosols. With FFP1 protection level, it is suitable for environments with contaminant levels up to 4 x TLV, providing efficient filtration while maintaining excellent comfort. The exhalation valve helps reduce heat and moisture buildup, while the adjustable nose clip ensures a secure and ergonomic fit. The latex-free elastic straps provide additional comfort and safety. Certified according to EN 149:2001+A1:2009, this mask is ideal for light construction, maintenance, woodworking, and general dust protection.

Key features

- > FFP1 NR D protection against solid particles.
- > Exhalation valve for better breathing comfort.
- > Adjustable nose clip for a perfect fit.
- > Latex-free elastic straps.
- > Certified EN 149:2001+A1:2009.

Specifications

Certification	EN 149:2001+A1:2009
Maximum level of use	4 x TLV
Protection class	FFP1 NR D
