

AUTOMATIC TIE-DOWN STRAP 25MM 3,65M 680KG S-HOOKS VICAA25365680S

The strap is suitable for securing and stabilising loads during transport, logistics, technical assistance or professional use in work vehicles. This accessory stands out for its automatic system, which makes strap retraction easier, making use more practical and organised after each application. Made from PES, it combines strength and flexibility for firm and controlled lashing. The steel S hooks allow secure fastening to suitable anchoring points, contributing to better load retention during transport. With a maximum load capacity of 680 kg and EN 12195-2 and GS certification, it is a compact and functional solution, prepared for frequent use in professional contexts.

Key features

- > Automatic system, making strap retraction easier after use;
- > Secure load fastening, suitable for transport and logistics;
- > Steel S hooks, ensuring resistant anchoring;
- > PES construction, suitable for frequent use;
- > Load capacity up to 680 kg for professional operations;
- > EN 12195-2 and GS certification, reinforcing safety during use.

Specifications

Certification	EN 121952-2, GS
Hook	Type S in steel
Maximum lifting capacity	680 kg
Material	PES
Weight	0,749 kg
Size	3,65 M x 25 mm (680 kg)
