

BLUE HIGH-VISIBILITY TROUSERS

VICAVAZ40

Designed to ensure greater safety and comfort in professional environments where high visibility is required, they are ideal for use in construction, logistics, maintenance, and outdoor work. Made from 240 g/m² fabric comprising 65% polyester and 35% cotton, it strikes an effective balance between durability, comfort, and freedom of movement. The two reflective strips on each leg improve the wearer's visibility in low-light conditions or areas where machinery and vehicles are in operation. Equipped with six conveniently placed pockets, it allows you to carry tools, accessories, and personal items in a more organised manner. In addition, the zipper with a snap fastener ensures a secure and comfortable fit when worn. Certified to EN ISO 20471 Class 2, these trousers meet the safety requirements for high-visibility clothing.

Key features

- > High visibility, with two reflective strips on each leg;
- > Comfort and durability, thanks to the 240 g/m² polyester and cotton fabric;
