

## HIGH-VISIBILITY JACKET VEST VICCAVL

VITO`s High-Visibility Jacket Vest ensures the wearer`s visibility in low light conditions, especially in professional and industrial contexts. This piece stands out for its versatility as, thanks to its removable sleeves, it can be worn as a jacket or as a vest. It is equipped with reflective strips certified according to EN ISO 20471 standards, allowing the worker to be visible even in demanding low-light environments. In addition, it stands out for its lightness and waterproof and cold-resistant properties, providing comfort and durability, even in prolonged use.

### Key features

- > High durability thanks to the fabric`s resistance;
- > Front zip with chin guard, placket and cord locks;
- > Elasticated cuffs and adjustable waist hem with elasticated drawstring and cord lock;
- > Double strips with segmented reflective lists to increase safety;
- > High visibility certified according to EN ISO 20471 standards.
