

TELESCOPIC HANDLE FOR TREE PRUNER VITPA

VICEA

The Extendable Handle for VITPA Telescopic Tree Pruner from VITO is an essential tool for those looking for practicality and efficiency when pruning tall trees and shrubs. With length adjustment between 1.22 m and 2.40 m, it allows you to reach high branches without the need for ladders, providing greater safety. Made from aluminum, it is light and resistant, ensuring durability and comfort during use. Ideal for pruning in backyards, gardens and agricultural areas, the handle offers excellent control and precision, making the pruning process more efficient and safe.
