

## HIGH VISIBILITY WAISTCOAT VICRL

The reflective safety vest is designed to increase user visibility in high-risk working environments such as construction sites, roadworks, logistics, warehouses and industrial areas. Made from 100% polyester fabric with a thickness of 0.18 mm, it is lightweight and practical, allowing it to be worn over other workwear without restricting movement. Reflective bands positioned on the torso ensure adequate visibility in low-light conditions or high-traffic areas, complying with EN ISO 20471 Class 2 requirements. It features a front hook-and-loop closure for quick and easy wearing. Suitable for professionals requiring a simple and effective high visibility solution.

### Key features

- > Class 2 high visibility safety vest
- > EN ISO 20471 certified
- > 100% polyester fabric
- > 0.18 mm thickness
- > Reflective bands on torso
