

GRAFTING POCKET KNIFE 100MM VICTE

Grafting knife designed for precise cutting operations on branches and shoots, suitable for grafting work in gardening, horticulture and agriculture. The carbon steel blade ensures clean and accurate cuts, supporting proper plant tissue connection. The blade shape allows easy bark opening and accurate graft positioning, improving efficiency during grafting tasks. Its compact construction offers good handling and control, making it suitable for professional and experienced users. Manual tool intended for plant maintenance, nurseries, orchards and general outdoor cultivation tasks where cutting accuracy is essential.

Key features

- > Carbon steel blade for precise cuts
- > Blade profile suitable for grafting work
- > Controlled handling during manual operations
- > Durable and functional construction
- > Suitable for gardening and agricultural use
