

GRINDING WHEEL FOR CHAINSAW SHARPENER

VIDAF

Disc designed for use with electric chain sharpeners, suitable for sharpening chainsaw chains used in gardening, agriculture and outdoor maintenance. It allows controlled restoration of the cutting edge, supporting consistent chain performance. With a diameter of 108 mm, it is compatible with electric sharpeners designed for this size, ensuring stability during sharpening operations. The disc structure enables even material removal for accurate and balanced results. Accessory intended for regular chain maintenance, helping extend chain lifespan and improve cutting efficiency during pruning, firewood cutting and land clearing tasks.

Key features

- > Suitable for electric chain sharpeners
- > Provides controlled and even sharpening
- > Supports efficient chain cutting performance
- > Standard 108 mm diameter
- > Practical accessory for routine maintenance
