

WOOD CUTTING TUNGSTEN CARBIDE-TIPPED BLADE FOR CIRCULAR SAW VIDC140

This tipped wood-cutting blade ensures clean, precise and stable cuts across various wood materials such as solid wood, MDF, chipboard and composites. The carbide-tipped teeth offer long-lasting sharpness and consistent performance even under frequent use. Its balanced steel body reduces vibration and improves cutting accuracy, making it suitable for both handheld and bench saws. The range of available sizes ensures compatibility with many types of machines. A dependable choice for carpentry, woodworking, furniture assembly and on-site cutting tasks.

Key features

- > Carbide-tipped teeth for excellent durability and clean cuts.
- > Suitable for solid wood, chipboard and composites.
- > Balanced steel body minimizes vibration and improves accuracy.
- > Ideal for carpentry, woodworking, furniture assembly and site work.
- > Consistent performance under continuous use.

Specifications

| | |
|----------------|--------------------------|
| Diameter | 140 mm |
| Disc thickness | 1,4 mm |
| Inner hole | 30 mm |
| Rotation speed | 10000 |
| Teeth | 16 |
| Size | 140 mm - 16 teeth |

Variants

| Reference | Size |
|----------------|-------------------|
| VIDC140 | 140 mm - 16 teeth |
| VIDC150 | 150 mm - 24 teeth |
| VIDC160 | 160 mm - 16 teeth |
| VIDC180 | 180 mm - 24 teeth |
| VIDC185 | 185 mm - 24 teeth |
| VIDC210 | 210 mm - 24 teeth |
| VIDC216 | 216 mm - 24 teeth |
| VIDC235 | 235 mm - 30 teeth |
| VIDC250 | 250 mm - 24 teeth |
| VIDC255 | 255 mm - 40 teeth |
| VIDC305 | 305 mm - 40 teeth |
| VIDC315 | 315 mm - 40 teeth |
