

AUTOMATIC HOSE REEL 20M + 2M

VIEAM20

VITO`s Automatic Hose Reel is a solution for organising hoses, ensuring practical storage and protecting them from the elements, UV rays and dirt. This product, equipped with a 20-metre PVC hose, stands out for incorporating an automatic retraction system that allows the hose to be organised more quickly and easily, optimising the user`s work and avoiding kinks. The reel has a handle to help carry the equipment and an automatic stop function that prevents accidental hose retraction and allows you to set the point at which the hose is to be reeled or unreeled. In addition, it has a 2 metre tap fitting, which makes it possible to connect it to a tap. This reel is also characterised by its removable bracket, which allows the equipment to be attached to the wall.

Key features

> **Equipped with a 20m PVC hose;**
> **Includes a 2-metre extension to connect to a tap;**
> **Practicality ensured by the automatic retraction system;**
> **It contains an automatic stop function, allowing you to control the coiling and uncoiling of the hose;**
