

STAINLESS STEEL TAPING KNIFE

VIEIA150

VITO's Stainless Steel Taping Knife is ideal for applying and removing paint and putty, particularly in construction and painting work. This tool, made of stainless steel, can be used on various surfaces, allowing you to apply, spread or scrape putty and bitumen. As such, it offers efficiency in surface preparation and ensures uniform finishes. With an ergonomic handle and lightweight structure, it reduces user fatigue during prolonged tasks.

Key features

- > Made of stainless steel, ensuring flexibility and resistance;
- > Efficiency in applying putty and removing paint;
- > Ergonomic handle ensuring comfort;
- > Lightness that reduces fatigue.
