

FENCING WIRE TENSIONING RATCHET LACQUERED

VIER2

Lacquered vineyard wire tensioner designed for tightening wires used in agricultural support structures such as vineyard trellis systems and plant training installations. The adjustment system allows easy control of wire tension, helping maintain the stability of the support structure. The lacquered finish provides a protective coating over the metal surface, improving the appearance and offering surface protection against humidity and normal wear. Suitable for installation, maintenance and adjustment of wires in vineyard trellis systems.

Key features

- > Designed for vineyard trellis systems
- > Allows easy wire tension adjustment
- > Lacquered protective coating
- > Suitable for agricultural support structures
- > Facilitates maintenance of wire systems
