

PROFESSIONAL ALUMINIUM STEPLADDER

VIEA5P

This professional aluminium ladder is built for high-demand environments, ensuring safety, stability and long-lasting performance. Its structure is reinforced with robotic welding and features extra-wide 120 mm steps, a spacious PVC anti-slip platform, safety straps and an integrated tool tray. High-quality joints and non-slip feet provide excellent grip and balance. EN 131 compliant, it is ideal for professionals in construction, maintenance, and industry.

Key features

- Aluminium structure with robotic welding for superior strength.
- Wide PVC platform with anti-slip surface.
- 120 mm wide steps for safety and comfort.
- Built-in tool holder for quick access.
- Safety straps and high-quality joints.
- Non-slip feet for secure positioning.
- Complies with EN 131 standards.
- Ideal for professional and industrial use.

Specifications

Height	1910 mm
Ladder rungs	530 mm
Ladder rungs no.	5
Length	580 mm
Maximum attainable height	1,10 m
Non-slip ladder feet	Yes
Non-slip work platform	Yes
Product weight	8.191 kg
Safety straps	Yes
Stepladder	Aluminium
Tool holder	Yes
Weight with packaging	8.401 kg
Width	120 mm
