

HSS HACKSAW BLADE 24 TPI

VIFCFHK

The 12" - 300 mm HSS metal cutting blades with 24 TPI are engineered to provide fine, precise and consistent cuts in ferrous metals. Made from high-speed steel (HSS), they offer excellent wear resistance and maintain sharpness even during intensive use. With 24 teeth per inch, they deliver superior control and a clean finish, ideal for cutting iron, steel, metal pipes, profiles and thin sheets. The universal 12" - 300 mm size ensures compatibility with most standard hacksaws. Widely used in workshops, metalworking, maintenance and DIY tasks, these blades provide durable, reliable and consistent performance. Their high-quality sharpening ensures smooth cutting with less effort.

Key features

- > HSS blade with excellent wear resistance.
- > 24 TPI for fine, precise and clean cuts.
- > Suitable for iron, steel, pipes and metal profiles.
- > Maintains sharpness even under heavy use.
- > Fits standard hacksaws.
- > High performance for professional applications.
