

MANURE FORK WITH IRON HANDLE VI1340

Iron handle pitchfork designed for handling and moving loose materials, suitable for agriculture, gardening and outdoor maintenance. It allows lifting, turning and transporting hay, straw, plant residues, manure and other organic materials efficiently. Made from tempered steel, it provides strong wear resistance and high durability for frequent use. The iron handle ensures enhanced structural strength, making it suitable for more demanding agricultural tasks. Available in different sizes and tine configurations, it suits a wide range of applications, from regular duties to heavier work in rural and farming environments.

Key features

- > Tempered steel for durability and wear resistance;
- > Iron handle for increased structural strength;
- > Suitable for hay, straw and organic waste;
- > Designed for intensive agricultural use;
- > Available in multiple sizes and configurations.
