

CHECK VALVE WITH STAINLESS STEEL FILTER 1"

VIFRA1

This 1" (25.4mm) check valve with a stainless steel filter has been specially designed to provide effective protection in fishing and hydraulic systems. Compatible with the VITO fishing tube Ref. VIP9, this valve includes a bottom valve that ensures a continuous and efficient flow of liquids. The integrated filter is essential as it retains particles and dirt that could compromise the system's operation. The stainless steel construction not only ensures durability but also resistance to demanding conditions, making this valve an ideal choice for applications where protection and efficiency are critical.
