

IRRIGATION KIT WITH HOSE 12MM - 1/2"

VIK1215

The 1/2" (12mm) flexible PVC hose, 15 meters in length, is the ideal solution for your watering and water transport needs. Made with 3 braided layers, this hose offers excellent resistance and durability, ensuring reliable performance even with intensive use. Its UV resistance ensures longer durability over time, protecting it from sun damage. This complete kit includes, in addition to the hose, a watering nozzle to facilitate water flow control, making your watering more efficient and suited to your needs. The kit also features a quick coupling system, consisting of a connector, a joint, and a STOP connector, allowing you to easily and efficiently connect and disconnect accessories, preventing water waste. Manufactured in Portugal, this hose reflects the quality and reliability of Portuguese products, making it perfect for domestic use, in the garden, or for any application requiring safe and effective water transport.

Key features

- > Flexible PVC hose with 3 braided layers: Provides greater resistance and durability for daily use.
- > UV resistance: Ensures a prolonged lifespan, even when exposed to sunlight.
- > Quick coupling system: Includes watering nozzle, connector, coupling, and STOP connector for an easy and efficient connection.
- > Made in Portugal.
