

PVC INDUSTRIAL GLOVE 35CM VILIPVC35

The industrial PVC glove is designed for professional tasks requiring effective protection against mechanical risks and contact with liquids in industrial and maintenance environments. The fully PVC-coated construction ensures waterproof performance, creating a continuous barrier that protects the hand from moisture, dirt and external agents during handling tasks. The cotton inner lining contributes to stable use by assisting moisture absorption during extended working periods. The long cuff provides additional forearm protection, reducing exposure risk. The glove complies with EN 388:2016+A1:2018 and EN ISO 21420:2020 standards and falls under protection category II.

Key features

- > Fully PVC coated
- > Waterproof for liquid contact
- > Good abrasion resistance
- > Effective protection in industrial environments
- > Cotton inner lining
- > Long cuff for forearm protection
- > Suitable for general handling and maintenance
- > EN 388 and EN ISO 21420 certified
- > Protection category II

Specifications

Certification	EN 388:2016 and EN 420:2003+A1:2009
Coating	PVC
Fully coated	Yes
Lining	Cotton
Safety Rating	Cat. II
Waterproof	Yes
