

CUT-RESISTANT CHAINSAW GLOVES 10"

VILM10

Made of polyester, the gloves feature non-slip segments and cowhide padding, ensuring superior grip when handling the machines, which prevents slipping and increases user control. Besides, the back of the left hand includes an anti-cut reinforcement, specially designed to protect against impacts and possible slips or accidents with the chainsaw. As such, it provides durability and protection while maintaining the flexibility needed to get the job done. With fluorescent orange reflective details, the gloves can be identified even in environments with reduced visibility or low light conditions, contributing to safer working conditions. To ensure greater adaptability, this accessory features a velcro strap for a secure and comfortable fit around the wrist. In addition, the gloves ensure full compliance with professional requirements, being classified according to standard class 1, design A, type 2, which translates into a level of protection suitable for the demands of forestry work.

Key features

- > Anti-cut reinforcement on the back of the left hand for greater safety when operating chainsaws;
- > Superior grip thanks to cowhide leather with anti-slip properties;
- > Velcro strap on the wrist, ensuring a secure and comfortable fit;
- > Reflective fluorescent orange details ensuring high visibility;
- > Class 1, design A, Type 2 certification, meeting the protection requirements for professional chainsaw work.
