

YELLOW LATEX-COATED MULTIFUNCTION GLOVE VILMAM

The multi-purpose latex glove is designed for general handling tasks that require good mechanical resistance and hand protection. The latex coating on the palm and fingertips improves grip and control when handling objects in various working environments. The cotton lining provides a breathable structure suitable for prolonged use. It complies with EN 388:2016+A1:2018 and EN ISO 21420:2020 standards, ensuring protection against mechanical risks and classified as Protection Category II. The elastic cuff ensures a secure fit, while the breathable back enhances hand ventilation.
