

ULTRA THIN PU-COATED GLOVE

VILU10

The ultrathin polyurethane glove is designed for tasks requiring high dexterity, tactile sensitivity and precise hand control. The polyurethane coating on the palm and fingertips provides good grip, abrasion resistance and effective protection for light handling and fine assembly tasks. The polyester liner and seamless knitted construction ensure comfort during prolonged use, allowing an excellent fit and reducing hand fatigue. The breathable back and elastic cuff offer proper ventilation and secure wrist fit. The glove complies with EN 388:2016+A1:2018 and EN ISO 21420:2020 standards and falls under protection category II.

Key features

- > Polyurethane coating on palm and fingertips
- > Good abrasion and tear resistance
- > High dexterity and tactile sensitivity
- > Seamless knitted construction
- > Breathable polyester liner
- > Elastic cuff for secure fit
- > EN 388 and EN ISO 21420 certified
- > Protection category II

Specifications
