

## POWDER-FREE ULTRA-RESISTANT NITRILE GLOVE - 50 UN.

### VILURL

This single-use glove has been designed for professional settings that require an effective barrier against mild chemical agents and biological contamination, while maintaining comfort and tactile sensitivity. It is suitable for hygiene tasks, light maintenance, technical cleaning, and controlled handling. Made of nitrile, it provides a good level of dexterity and precision, facilitating the handling of tools, components, or delicate surfaces. The textured surface improves grip when in contact with liquids, contributing to greater control when performing tasks. Classified as Category III PPE, this glove offers protection against bacteria, fungi, and viruses, making it a suitable solution for environments where hygiene, chemical safety and contamination control are priorities.

#### Key features

- > Effective barrier against light chemical agents;
- > Protection against bacteria, fungi, and viruses;
- > High tactile sensitivity for precision work;
- > Textured surface, improving control when in contact with liquids;
- > Single-use for greater hygiene and safety;
- > Powder-free, suitable for sensitive users;
- > Suitable for cleaning, light maintenance, and technical handling.

#### Specifications

Certification	EN ISO 21420:2020, EN ISO 374-1:2016+A1:2018
Coating	Nitrile
Packaging	50 un.
Size	9" - L
Protection class	Cat. III

#### Variants

Reference	Size
VILURL	9" - l
VILURM	8" - m
VILURS	6" - s
VILURXL	10" - xl
