

RUBBER MEMBRANE FOR PRESSURE TANK

VIMBD24

This rubber membrane is designed for use in pressure tanks with a capacity of 24 liters. Compatible with various tank models such as the VIDF24, VIDI24, and VIDV24 from VITO, it ensures the proper separation between compressed air and water inside the tank, guaranteeing efficient performance and a long lifespan for the equipment. The rubber membrane is durable and easy to install, making it an essential component for maintaining the integrity of the pressure system and preventing operational failures, such as pressure loss or damage to the tank.

Specifications

Capacity	24L
