

## TOOL BOX VIM13

Toolbox manufactured from durable plastic material, designed for the storage, transport and organization of hand tools and related accessories. Its robust construction allows professional use while ensuring adequate protection of the contents. Equipped with a retractable carrying handle, it includes a removable internal tray that facilitates separation and access to smaller tools. The lid features three upper compartments for consumables and small components. The locking system is compatible with a padlock, not included.

### Key features

- > Robust structure suitable for professional use
- > Removable tray for improved internal organization
- > Upper compartments integrated into the lid
- > Retractable handle for comfortable transport
- > Padlock-compatible closure for increased security
