

WATER INLET FILTER FOR HIGH PRESSURE MACHINES

VIMLFA

The VITO universal water inlet filter is designed to protect pressure washers from dirt and debris in the water supply. Made from durable materials, it prevents internal damage and ensures a clean, consistent water flow. Compatible with most pressure washer models, it's quick to install and essential for effective maintenance.

Key features

- > Universal compatibility with pressure washers.
- > Filters out dirt and impurities.
- > Prevents motor and pump damage.
- > Easy to install and clean.
- > Extends the machine's lifespan.
