

MINI BLOW TORCH WITH LIGHTER VIMMCI

Fuelled by butane gas, it has a 1300°C flame that guarantees a controlled, consistent, and precise operation. Compact and practical for excellent performance in any situation, such as light welding work, lighting gas cookers, burning wood finishes, or even when making desserts. The integrated lighter system makes it practical and easy to use, while the adjustable flame allows you to customise the intensity for different applications.

Key features

- > Locking button for safety and to prevent accidents;
- > Continuous use button to optimise the user's work and reduce fatigue;
- > Versatility guaranteed by the flame intensity regulator;
- > Compact and lightweight design, easy to transport and store;
- > Compatible with gas lighter refills;
- > Ideal for bricolage, cooking, crafts, and small repairs.
