OUTER MODULE 2 COMPARTMENTS FOR MODULAR TOOL BOX

VIMME2

VITO`s Outer Module with 2 Compartments for Modular Tool Box has been developed to provide additional storage space for frequently used accessories and tools. Compatible with VITO`s modular tool boxes, this module attaches to the outside, increasing storage capacity without compromising the interior space of the tool boxes. With two adjustable compartments, it provides convenient access to tools and offers greater versatility in organisation, allowing components to be separated simply and efficiently. Made of resistant material and with quick-fit assembly, it guarantees durability and stability, even under intensive working conditions.

Key features

- > Convenient access, no need to open the tool box;
- > Organisation guaranteed by the two adjustable compartments;
- > Optimises the capacity of the modular tool box without taking up interior space;
- > Compatible with VITO`s modular tool boxes, allowing you to create a complete and customised system.
