

SPRAY TIP FOR AIRLESS PAINT SPRAYER

VIMPAB213

The VITO Airless Spray Nozzle is engineered for professional-grade finishes with consistent coverage and minimal overspray. Each tip features a coded number: The first digit defines the spray fan width. The last two digits indicate the orifice size (paint flow rate). Available in several versions (213, 313, 315, 415, 517, 617), it's ideal for latex, acrylic, enamel, and varnish applications.

Specifications

Compatible with	VIMPA850
