

SPRAY TIP FOR AIRLESS PAINT SPRAYER 20° 100-150 MM VIMPAB213

The VITO VIMPAB213 Airless Spray Tip is designed for applications requiring high precision and spray control. Compatible with the VIMPA850 airless paint sprayer, it features a 100-150mm spray fan and a 0.013" orifice, making it ideal for detailed work and small surface applications. Suitable for lacquers, enamels and solvent-based paints, it delivers a uniform finish on metal structures, technical parts and other surfaces requiring greater painting accuracy.
