

SUCTION HOSE FOR WATER PUMP

VIMS100

The Suction Hose with a diameter of 100mm, available in lengths of up to 50 meters, is the ideal solution to ensure efficient and reliable pumping in various applications, from agricultural irrigation to residential water collection systems. Made from PVC with spiral reinforcement, this hose offers superior abrasion resistance and excellent flexibility, allowing it to easily adapt to demanding working conditions.

Key features

- > **Durable material:** Constructed from high-quality PVC with spiral reinforcement, providing durability and resistance against kinks and crushing.
- > **High capacity for negative pressure resistance:** Maintains a constant water flow, preventing interruptions during pumping.
- > **Flexible and lightweight:** Easy to handle and install, even in locations with curves or uneven terrain.
