

AUTO-DARKENING WELDING FILTER FOR WELDING HELMET VIMSETC VIMSETC.D

VITO`s Auto-Darkening Welding Filter for Welding Helmets incorporates advanced True Color View technology, which provides a more natural and clear view of the work area, ensuring immediate and real visualisation of the welds made. With an extremely fast darkening response time of just 1/30,000 seconds at room temperature, it safely guarantees the welder`s eyes will be protected instantly when the arc starts. The shade range is adjustable between 5 and 13, allowing continuous adaptation according to your needs.

Key features

- > Automatic darkening for immediate eye protection;
- > High sensitivity to light, guaranteeing efficiency;
- > Clear vision that promotes productivity outside the welding process;
- > Easy, practical, and quick replacement;
- > More comfort and safety;
- > Compatible with VITO`s True Color Auto-Darkening Welding Helmet.
