

CUT-RESISTANT CHAINSAW CHAPS

VIPACM

Made from 300D polyester, the chaps combine high resistance with durability, maintaining a balanced weight for greater comfort during felling operations and intensive work with chainsaws. It provides safety coverage from the waist to the ankles, fully covering the areas most exposed to accidental cuts. This accessory also incorporates eight layers of high-performance polyester, capable of quickly stopping the movement of the machine chain, reducing the risk of severe injury. Adjustable fastenings on the waistband and along the legs, with sturdy ITW buckles, allow for efficient adjustment so you can work more comfortably. Although it is one size fits all, these chaps have buttons that, when aligned with the waistband, allow you to reduce and adjust its length. This accessory also includes a front pocket, useful for storing small tools or essential accessories while working, promoting productivity. In addition, the reflective fluorescent orange colour significantly increases visibility in dense vegetation or low light environments, enhancing overall user safety. The chaps are certified Class 1, Design B, offering a level of protection suitable for demanding forestry work.
