

## HIGH VISIBILITY PARKA

### VIPA VL

The high visibility parka is designed to provide effective protection and enhanced visibility for outdoor work, particularly in adverse weather conditions. The outer fabric made of 300D Oxford polyester with polyurethane coating ensures waterproof performance and resistance to wear. The fully lined and padded polyester interior offers suitable thermal insulation for cold environments. Reflective bands positioned on the front, collar and sleeves ensure high visibility in low-light conditions, complying with EN ISO 20471 Class 3 requirements. It features a front zip closure with snap button protection, a concealed hood inside the collar and several functional pockets, including front pockets with flap and hook-and-loop fastening. Also certified according to EN ISO 13688 and EN 343, this parka is suitable for professionals requiring high visibility, waterproof and weather-resistant outerwear.

#### Key features

- > Outer fabric: 300D Oxford Polyester/Polyurethane;
