

## HAND PALLET TRUCK WITH DIGITAL SCALE 2.5 T VIPPD25

The pallet truck with digital scale is designed for handling and weighing loads in warehouses, workshops, logistics centers and industrial environments. Equipped with an integrated digital scale, it allows the load to be weighed directly during pallet transport, improving weight control and operational efficiency. The robust hydraulic lifting system ensures stable and safe lifting, making it suitable for professional use. The system also includes automatic release for safer load handling. With a load capacity of up to 2.5 tons and a reinforced structure, this pallet truck provides durability and efficiency in daily operations. The maximum lifting height allows easy pallet handling, while the forks with 570 mm width provide stability during transport. Solid nylon wheels offer high wear resistance and smooth movement across industrial floors. Double load rollers improve weight distribution and operational stability.

### Key features

- > Integrated digital scale for load weighing
- > Robust hydraulic lifting system
- > Automatic release system for safer operation
- > Load capacity up to 2.5 tons
- > Reinforced structure for durability
- > Maximum lifting height of 200 mm
- > Fork width of 570 mm for stability
- > Solid nylon wheels with high wear resistance
- > Double load rollers for improved stability

### Specifications

Fork length	<b>1100 mm</b>
Fork width	<b>570 mm</b>
Load capacity	<b>2,5 ton</b>
Maximum lift height	<b>200 mm</b>
Reinforced structure	<b>Yes</b>
Wheels	<b>Solid nylon</b>
Size	<b>570 x 1100 mm</b>
