

SQUARE HEAD SHOVEL VIPQCM

VITO's Square Head Shovel in tempered steel (VIPQCM) is ideal for use in construction, gardening, and agricultural environments. Constructed with a square-shaped tempered steel blade, it is ideal for digging up soil. It also allows heavy materials such as sand, soil, and gravel to be loaded and transported in large quantities, making tasks more efficient. The shovel is also suitable for levelling surfaces and distributing materials evenly, which is especially useful in construction and gardening work. In agricultural and gardening activities, it is perfect for preparing and stirring the soil, making holes for planting, or covering areas with soil. With its ergonomic shaft and Y-shaped handle, this model offers secure control and comfort during prolonged use.

Key features

- > Superior Durability: High-quality tempered steel, resistant to wear and impact;
- > Comfort and Ergonomics;
- > Greater Control: The Y-shaped handle offers secure and firm working, providing precision when digging and moving materials.
