3-IN-1 HACKSAW
VIS3E1

VITO`s 3-in-1 Hacksaw (VIS3E1) is suitable for making versatile 45º and 90º cuts and can also be transformed into a keyhole saw for greater practicality. This multifunction tool has two modes of use: hacksaw for metal and keyhole saw. The first option, suitable for cutting metal, stands out for being able to make cuts at 45º and 90º. The keyhole saw, ideal for cutting wood, plasterboard, and plastic, is characterised by its smaller size, which ensures greater control over the task at hand. In addition, the hacksaw is equipped with a tensioner that makes it possible to adjust the tension of the blade. In terms of ergonomics, the tool includes a rubber handle that increases user comfort and helps reduce user fatigue.

Key features

> Versatility thanks to the variety of cutting options;
> Multi-purpose hacksaw with 45º and 90º blades;
> Practical keyhole saw thanks to its smaller size;
> Tensioner to adjust the tension of the blade;
> Ergonomic thanks to the rubber handle.
