

FLUORESCENT YELLOW ACRYLIC SPRAY PAINT

VISAFAM

This paint has been developed for applications where high visibility and colour contrast are required, making it suitable for markings, signage, decoration, or creative work. Its fluorescent formulation provides high luminosity and reflectivity, allowing the painted surface to be easily visible even in low light conditions. When applied to white surfaces, the fluorescent effect is amplified, increasing visibility from a distance and ensuring an even more striking finish. This feature is particularly useful in contexts involving temporary markings, visual signage, decoration, or identification of specific areas. With quick-drying properties and high coverage, the spray facilitates paint application and allows for uniform results with few passes. Additionally, it can be used both indoors and outdoors.

Key features

- > High visibility thanks to fluorescent finish;
- > Reflective capability, useful in low-light environments;
- > Amplified fluorescent effect on white surfaces;
- > Suitable for indoor and outdoor applications;
- > Quick drying, optimising work performance;
- > Uniform finish guaranteed by high coverage.

Specifications

Packaging	400 ml
Quick drying	Yes
Colour	Yellow fluorescent

Variants

Reference	Colour
VISAFAM	Yellow fluorescent
VISAFVE	Green fluorescent
VISAFVM	Red fluorescent
