

HEAT-RESISTANT ALUMINIUM ACRYLIC SPRAY PAINT VISATAL

This paint has been developed for painting and protecting metal surfaces subject to intense heat, providing a resistant and long-lasting finish. Its silicone resin-based formulation ensures good adhesion and thermal stability, allowing the paint to maintain its performance even in demanding environments. Resistant to temperatures up to 600°C, it is especially suitable for use in fireplaces, stoves, ovens, radiators, and other metal equipment subject to high temperatures. The paint withstands heat without compromising the finish, helping to preserve and renew the appearance of metal surfaces. With quick-drying properties and high coverage, the spray makes it easy to apply the paint and allows you to achieve uniform results with just a few coats. Additionally, it can be used both indoors and outdoors.

Key features

- > Thermal resistance up to 600°C;
- > Suitable for metal surfaces exposed to intense heat;
- > Useful in fireplaces, stoves, ovens, radiators, and other metal equipment;
- > Formulation with silicone resins for better adhesion and durability;
- > Suitable for indoor and outdoor applications;
- > Quick drying, optimising work performance;
- > Uniform finish guaranteed by the great coverage.

Specifications

High-temperature resistant tape	Up to 600°C
Quick drying	Yes
Packaging	400 ml
Suitable for	Fireplaces, cookers, ovens, car radiators, etc
Colour	Aluminium

Variants

Reference	Colour
VISATAL	Aluminium
VISATPR	Black
