

WELDING WIRE 1MM 60/40 250GR VISF1250B

The 60/40 Sn60Pb solder wire with 1 mm diameter is suitable for electronics, repairs and technical assembly. Its excellent flow characteristics produce clean, uniform joints with reduced risk of imperfections. The internal SW32 flux provides fast activation and strong wetting behaviour, ensuring secure adhesion to the base material. The 250 g reel offers ample capacity for technicians and repair workshops requiring consistent, easy-to-apply solder.

Key features

- > Sn60Pb alloy ideal for precise electronic soldering
- > SW32 flux for excellent wetting and adhesion
- > Produces clean and uniform joints
- > Reliable performance on small components
- > Suitable for technicians and repair workshops
- > 250 g reel for extended use

Specifications

Composition	60Pb / 40Sn
Diameter	1.0 mm
Type	SW32
Weight	250 gr
