

CARPENTER PINCER 180MM VITC180

Carpenter’s pincers designed for pulling nails, cutting wire and handling metal fasteners in carpentry, construction and maintenance work. Manufactured with a forged chrome vanadium steel body, providing high mechanical strength and durability for professional use. The induction hardened cutting edges improve cutting performance and wear resistance. The head design allows efficient nail pulling and removal of fastening elements by applying controlled leverage. Bi-material handles provide improved comfort, grip and control during use.

Key features

- > Forged chrome vanadium steel construction
- > Induction hardened cutting edges
- > Suitable for nail pulling and wire cutting
- > Bi-material ergonomic handles
- > Durable tool for carpentry and construction

Specifications

Cutting edges	Induction hardened
Handle	Bimaterial
Material	Chrome vanadium forged steel
Size	180 mm
