

LOPPER WITH BUMPER

VITPBA

2-hand anvil lopper with bumper, with a carbon steel handle with moderate elasticity and hardness, a 75# carbon steel blade of which 7.5% carbon with tensile strength (Mpa) > 1080, heat treatment at 33-35°C ensures hardness but also stabilises and prevents breakage, the VITO anvil loppers are ideal for cutting (pruning) work, even for the most demanding tasks. Its ergonomic design saves the user a great deal of cutting effort. Made with carbon steel blades (7.5%) and a carbon steel handle, these shears are not only very light and precise but also very strong.

Key features

- > Suitable for cutting medium and thick branches
- > Curved forged steel blade
- > Anti-corrosion treatment for extended durability
- > Efficient cutting with reduced effort
- > Lightweight and resistant aluminium body
- > Ideal for gardening and green area maintenance

Specifications

Blade	Forged steel - anti-rust
Dimensions	200 x 320 x 800 mm
Material	Aluminium
Weight	1,73 kg
